PURCHASE OF *STAR*

The semimonthly issues and the cumulative index issues are available postpaid on subscription and in single copy from the Superintendent of Documents, United States Government Printing Office, Washington, D.C., 20402, United States of America.

Semimonthly issues . . .

Annual subscription rate: $54.00, domestic; $68.25, foreign. Price per single copy: $2.25, domestic; 25% extra for foreign mailing.

Cumulative index issues . . .

Annual subscription rate: $30.00, domestic; $35.00, foreign. Price per single copy varies according to the number of pages.

Domestic subscription rates . . .

Apply to the United States, Canada, Mexico, and all Central and South American countries, except as noted below.

Foreign subscription rates . . .

Apply to Argentina, Brazil, French Guiana, Guyana, Surinam, British Honduras, and all other countries throughout the world.

Payment should be by check, money order, or document coupons, and must accompany order. Remittances from foreign countries should be made by international money order, or draft on an American bank, payable to the Superintendent of Documents, or by UNESCO book coupons.

Scientific and Technical Aerospace Reports

Annual Indexes (Section III) January–December 1968

SPECIAL NOTICE

Starting with this issue of *Scientific and Technical Aerospace Reports* Annual Indexes, several significant changes have been made, not only in the format of this publication, but also in procedures for requesting the documents indexed. These are explained in the Introduction to Sections I or II; please read it through before referring to the Indexes.

The abstract sections of the semimonthly *STAR* issues can be bound separately. Individual abstracts can be located readily by means of the page numbers given at each index entry, e.g., 21 p 4190. To assist the user in binding *STAR* Volume 6, four title pages are included in the back of Section I of the Annual Indexes.

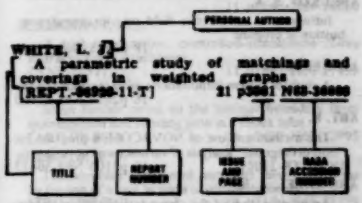
WHAT *STAR* ANNUAL INDEXES ARE

These Annual Indexes are edited consolidations of the indexes to the individual issues of *Scientific and Technical Aerospace Reports (STAR)* for the calendar year 1968 (Volume 6, Numbers 1 through 24). For the convenience of the user, they are divided into four sections, each bound separately. Sections I and II contain the Subject Index. Section III contains the Personal Author Index. Section IV contains a Corporate Source Index, a Contract Number Index, a Report/Accession Number Index, and an Accession Number/Report Index. The Annual Indexes supersede the semimonthly and quarterly indexes previously issued during 1968.

Each entry in these indexes includes a group of identifying numbers in the following form: 06 p 0850 N68-23456. The first two digits (06) identify the issue in which the document was announced. The "p" stands for page number, and the four digits that follow (0850) refer to the page number, in the designated issue, on which the abstract of the document appears. The next group of numbers (N68-23456) is the NASA Accession Number, a unique identification number assigned by NASA to each document that was acquired, indexed, and announced in *STAR* during the year.



In addition to these identifying numbers, each entry in the Subject Index contains a Notation of Content, a brief description of the contents of the document; each entry in the Personal Author and Corporate Source Indexes contains the exact title of the document.

At the beginning of each index in this cumulation, a typical listing is illustrated with each of its elements identified to assist the reader in using the different types of index entries.

For information on availability of *STAR* and documents, see Section I or II, page iii.

PERSONAL AUTHOR INDEX

TYPICAL PERSONAL AUTHOR INDEX LISTING

Listings in this index are arranged alphabetically by personal author. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document cited (e.g., NASA report, translation, NASA contractor report). The issue and page number identify the *STAR* issue in which the document was announced and the page number on which the citation appears. The NASA accession number denotes the number by which the citation is identified on that page. The titles are arranged under each personal author in ascending accession number order.
